

Pushkar Singh

AI/ML engineer

pushkar7singh7@gmail.com

Experience

Codec Networks, Product Development Intern, then AI Automation Developer

Jan 2026 – present

Developed intelligent ISO 27001 compliance automation workflows using n8n for enterprise clients.

Contributed to an AI-powered Managed SOC platform by building a RAG application with pgvector for semantic search across 350+ operational policy documents and implementing Shuffle SOAR integrations for automated security orchestration and incident response.

Rento India Marketplace, Founding AI Application Developer Intern Mar – Sept 2025

Designed and prototyped the mobile application for the Rento India Marketplace, creating user-centric interfaces for a peer-to-peer rental platform.

Contributed to AI chatbot development and machine learning model implementation using marketplace data to support intelligent recommendations and automated customer assistance.

Globtiter Infotech, Noida, Machine Learning Engineer Intern

June – July 2023

Worked on an end-to-end machine learning project involving data preprocessing, feature engineering, model training, and performance optimization using Python, Pandas, Scikit-learn, and NumPy.

Assisted in evaluating model accuracy and documenting project outcomes for deployment and future enhancements.

Kisan Diary (freelance)

In development

Developing Kisan Diary, an enterprise-grade Agriculture ERP platform designed for future government deployment, integrating farmer lifecycle management, plot management, secure authentication, digital payments, notifications, and AI-powered automation into a unified, scalable platform.

Projects

Domain-Tuned LLM for Sigma Detection Rules (QLoRA)

Aug 2026 – present

Fine-tuning an open-weight LLM to generate Sigma detection rules from threat descriptions, trained on the public SigmaHQ corpus with category-level held-out splits.

Built a compiler-based eval harness (sigma-cli) scoring schema validity, backend compilation, and field correctness; benchmarking against base and frontier models in MLflow.

AegisAI – Intelligent SOC & Threat Intelligence Platform

June – Aug 2026

Built an AI/ML-powered Cyber Threat Intelligence & Autonomous SOC platform using Python, FastAPI, PostgreSQL, and Neo4j, integrating Wazuh and threat intelligence for automated correlation and enrichment.

Implemented ML risk scoring, graph-based threat analysis, predictive intelligence, AI-driven investigations, autonomous triage, and Shuffle-based SOAR orchestration.

Research

Introducing AI Agents for Automating Corporate Workload

Research paper

With Aditya Pawar, Saurav Kumar Shukla, Dr. R. Reena Rose

Integrating Sentiment Analysis from Financial News for Enhanced Stock Market Prediction

Research publication

With Shuchi Sethi

Education

Master of Computer Applications, SRM Institute of Science and Technology, KTR

2024 – 2026, CGPA 9.67

Achievements	National Level Machine Learning Datathon, IntellectA, 2025	Best Innovation Award
	UST Global Sight 2.0 Competition, 2025	Top 25
	SRM Project Expo, 2025	Special Category Award
	PAN India Web Scraping Challenge, S.A. College of Arts & Science, 2025	Bronze certificate
	TECHZOOM, SRM IST, KTR, 2025	1st runner-up
	INFINITRIX project presentation, Loyola College, Chennai, 2024	1st runner-up

Positions of responsibility	President, LiveWires Club, SRM	July 2025 – July 2026
	Led the club's transition in to an innovation-driven, enterprise-oriented organization; managed diverse teams and drove new initiatives.	
	Vice President, Sports Department, AIIT, Amity University	Sept 2023 – May 2024
	Coordinated and motivated sports teams for major inter-university events, promoting teamwork, discipline, and high performance.	

Skills	Programming languages	Python, Java
	Generative AI and LLM tools	Transformers (Hugging Face), LangChain, LangGraph, N8N, MCP
	Data science and analytics	Machine Learning, Pandas, NumPy, Scikit-Learn, TensorFlow, Matplotlib, yfinance, Seaborn, Tableau, Power BI
	Databases	SQL, MongoDB, Pinecone
	Cloud and DevOps	AWS (EC2, Lambda, ECS, EKS, RDS, S3, DDB, Aurora, EBS), Azure, Git Bash, GitHub, Terraform(HCL), Jenkins, Ansible
	Tools and frameworks	Streamlit, Gradio, Google Colab, Jupyter Notebook, MLflow (MLOps), API Integration (FAST API, REST, OpenAI, Gemini, SerpAPI)
	Cyber security	Digital Accessibility testing (DAT), Configuration Audit
	Foreign language	German (Conversational)
